EDUCATION

Fisk University, Nashville, TN

Expected Graduation Date: **May 2028**

Bachelor of Science in Computer Science, Honors

GPA: 3.893

- **Relevant Coursework:** Data Structures & Algorithms | Computer Organization and Architecture | Intro to CS (Google-In-Residence) | Discrete Mathematics | Calculus I, II, III | OOP | Linear Algebra | Differential Equations
- **Honors:** Erastus Milo Cravath Presidential Scholarship, W.E.B. Du Bois Honors Program
- **Clubs and Affiliations:** ColorStack, Major League Hacking, Break Through Tech, AI4ALL, Google x BASTA

SKILLS

- **Technical Languages:** Python, C++, JavaScript, HTML/CSS, Java, SQL, Node.js, Tailwind
- **Frameworks/Libraries:** React, PyTorch, Numpy, Pandas, scikit-learn, OpenCV, LangChain, Matplotlib, Tensorflow
- **Developer Platforms:** Visual Studio, Hugging Face, GitHub, PyCharm, Figma, Git, Google Colab, Jupyter Notebook

WORK EXPERIENCE

Break Through Tech AI Program, Cornell Tech

Jun 2026 – Present

AI/ML Fellow

Remote

- Architected an end-to-end machine learning pipeline with complete data preprocessing, model selection, and hyperparameter tuning by engineering workflows in TensorFlow, scikit-learn, NumPy & Pandas across Neural Networks, Decision Trees, KNNs, and Logistic Regression models.
- Reduced manual applicant review time by an estimated 65% as measured by an 88% overall classification accuracy by automating initial application screening and routing complex edge cases to human reviewers.
- Expanded service reach for underserved low-income applicants as measured by a 94% recall rate by optimizing model hyperparameters to minimize false negatives and reliably detect candidates below financial benchmarks.

AI4ALL

Jun 2026 – Present

Machine Learning Fellow

Remote

- Built an end-to-end fraud detection pipeline with complete data preprocessing, feature engineering, and hyperparameter tuning by implementing an XGBoost classification model in Python, Scikit-learn trained on 1M+ transaction records.
- Achieved an 82% fraud detection rate as measured by a 93% overall accuracy on an imbalanced dataset (3.5% positive fraud cases) by optimizing loss functions and decision thresholds to minimize undetected fraudulent transactions.
- Communicated technical findings and deployment tradeoffs as measured by a final symposium presentation to industry experts by synthesizing model evaluation metrics, feature importance, and risk mitigation strategies.

PwC + Outamation

Feb 2025 – Mar 2025

Workflow Automation Extern

Remote

- Architected a production-style RAG pipeline as measured by complete document ingestion, chunking, and semantic vector indexing by utilizing Python, LangChain, ChromaDB, and open-source LLMs.
- Accelerated document query efficiency by an estimated 70% as measured by a reduction in retrieval latency to sub-second responses by optimizing vector classification strategies and retrieval pipelines for multi-page financial PDFs.
- Streamlined audit and financial analysis workflows as measured by an estimated 85% precision rate in context retrieval by replacing manual document reviews with AI-powered semantic search to minimize human extraction errors.

PROJECTS

MamaShield:

- Engineered and deployed a full-stack web application in >36 hours, winning 1st place overall at the Vanderbilt AI Un-Hackathon by leveraging Next.js alongside AI-assisted component generation workflows and LLM APIs.
- Reduced potential prenatal medication misclassification by an estimated 60% by real-time classification against official FDA drug safety databases by implementing an NLP-driven search and categorization engine.
- Expanded critical healthcare accessibility for high-risk users as measured by multi-modal input processing and automated safety routing by integrating computer vision, speech-to-text, and emergency triage workflows.

FortiFi:

- Architected a financial management platform, placing 2nd overall at the RISE x GWC Protothon 2026 by engineering a FastAPI backend integrated with Next.js/React Native using Zustand and SQLAlchemy.
- Increased user financial engagement and goal tracking adherence as measured by an estimated 40% increase in milestone completion by engineering a gamified behavioral progression system featuring XP tracking, goal routing, and interactive financial coaching.
